

Ateliers de l'évaluation - Cycle III
Grands engagements politiques
Quel suivi des résultats?

Atelier n° 11
European Fund for Strategic Investment
How will the outcomes be assessed?

Post-truth – an adjective defined as ‘relating to or denoting circumstances in which **objective facts are less influential** in shaping public opinion **than appeals to emotion and personal belief**’

Are the Evaluation Societies
rowing upstream?

Evaluating public action

- **Assessing public projects, programmes or policies based (as much as possible) on texts and facts:**
 - What was the problem to address?
 - What were our assumptions?
 - What did we want to do (objectives)?
 - What have we delivered? (outputs)?
 - How have we done it (process)?
 - What were the results (outcomes, impacts)?

Outcomes > ? < Objectives

Not easy => Evaluability

- **A public project, programme or policy is evaluable if:**
 - Its objectives are clearly defined
 - Where are we now?
 - Where do we want to go thanks to the project?
 - When will we be there?
 - Observable indicators allow for monitoring the outcomes related to these objectives
 - Realistic monitoring systems are designed
 - Monitoring is actually implemented

The Evaluation workshops cycle III

- Assessing the evaluability of important and recent public commitments / programmes
 - International
 - The Paris Agreement on Climate Change
 - The Sustainable Development Goals
